

Hymix

HyLite

An exposed
look that lasts

Decorative

HyLite

Designed to reveal the innate beauty of concrete, HyLite has the appeal of natural stone but without the problems of pavers, tiles or decking. Your flooring will have the strength and durability Hymix is known for, but tailored to your unique style.

Longevity is a key component to any flooring solution, HyLite ensures that the aggregate you place will look, feel and hold its strength well into the future.

Endless possibilities and combinations for the mix means you can transition an outdoor rugged slip-resistant look to an indoor smooth polished product, maintaining a uniform look in different application settings.

Design options

Tailored colours and textures designed for your taste means you can have statement and uniform flooring at a fraction of the cost.

Performs for a lifetime

Unlike traditional flooring options, HyLite uses inert materials, bound into a uniform mass. Giving it compressive strength and abrasion resistance. Perfect for domestic and high-traffic applications.

Save time and money

Faster install times than traditional flooring, HyLite is adaptable, fitting your desired space with no need for cutting. You'll have more time with loved ones as spills are quick to clean and stains are virtually non-existent.
